

CITY OF MILWAUKEE

MASTER PROPERTY FILE DOCUMENTATION

Introduction

The Master Property File, or MPROP as it is commonly referred to, is a computerized inventory of all properties in the city. It contains more than 90 elements of data describing each of the approximately 160,000 properties in the city. The file was created in 1975 to provide current and accurate property information with enough flexibility to and made available, the data has become invaluable and is of purposes. This same data is now being broadly distributed in a format that is compatible with commonly available computer equipment and operating systems.

Other property related data and custom reporting is also available on a request basis. Please direct your inquiries to:

The MPROP file, which was originally built in 1975 from records in the office of the Tax Commissioner, Department of City Development, and the Policy Development Information System (now GIS), was modified significantly in 1978 and then revised five more times until May, 1982. In 1983, when a major revision to the Tax system was designed, MPROP was modified significantly to add more data, to update it more frequently, and to provide more standard reports. As a result of this 1983 modification, additional data elements were added to each property record.

The frequency of update varies depending upon the current tax cycle. Year-end tax processing and tax assessment (March, April) periods require more frequent updates than other times of year. The current policy is to provide at least monthly maintenance throughout the year. Not all copies will be available in all distribution formats. Call ISD/GIS for information on the availability of MPROP data for your specific purposes.

The pages that follow are organized into sections which describe the data in MPROP and provide detailed descriptions of each data element found in the file. The appendices provide definitions of the various codes used in the file.

MPROP File Layout

This section contains information on each field in the MPROP file. The following example explains the information given:

DATA FIELD NAME	ALIAS FIELD NAME	DATA TYPE	FIELD LENGTH	RECORD POSITION	USAGE
'field name'	'alias name'	'code'	#	#	'code'
NEIGHBORHD	NEIGHBORHD	A	4	363-366	R

NEIGHBORHOOD - The name of the field is NEIGHBORHOOD;

NEIGHBORHD - The alias name of the field is NEIGHBORHD;

A - The type of the field data contents is alpha characters;

4 - The length of the field is 4;

363-366 - The position of the field begins at character position 363 and ends at position 366;

R - The data is maintained for Residential properties only.

Data Type Codes

"A" - A combination of alphabetic and numeric characters.

"N" - For all numeric values. Numeric data is provided in integer ASCII format. Decimal values are supplied as integers with an implied decimal. Thus when using the fixed field form of the MPROP data as described in Section 2 and 3, be aware That a N(5.2) data type will not include a decimal (which is implied by the format to be located in front of the first two digits from the right) and will be only 7 positions wide.

NOTE: The DATA TYPE codes are provided to assist data usage. Some fields are identified as alpha "A", even though the field may contain predominantly numeric data. Nonetheless, because the programs used by the City to generate the contents of these fields could place non-numeric characters in their contents, reading them as alpha will prevent the occurrence of data exception errors.

Usage Codes

R" - The field is maintained for residential classed properties (single, duplex, apartments, condominium etc.).

"C" - The field is maintained for commercial classed properties, including manufacturing.

MPROP Documentation

"B" - The field is maintained for both residential and commercial properties.

NOTE: Applications using the MPROP data must be sensitive to the specific assessment class of the individual property that the data relates to. The usage codes identified in Section 2 and the specific comments and code definitions included in Section 3 and further described in the appendices A-I should be closely reviewed when using the MPROP data.

Condominiums (SME)	6411 to 6461 & 6491	If a condominium development is located in an assignment number category, the last digit of the assignment area number will be more than "0", example, 6411, 6421, etc.
Condominiums (SME)	5000 Series	A neighborhood is assigned to each (Residential as opposed to commercial) condominium development. The numbers start at the north side of the city, and progress south, except for the east side area, east of Humboldt Bd., which is numbered last, and has the highest numbers.
Commercial Apartments (4 units and up) (MAP)	6610 – 6899	The city is divided into economic geographic areas. A neighborhood number is assigned to each area with the numbers starting at the north side of the city, and progressing to the south. Some of the economic, geographic areas have a wide variation in the age of buildings, resulting in an economic overlay. This overlay will reflect in the value of older buildings in an area, and will result in some areas having more than one number.
Exempt (EXM)	0200-6899	Any property that is exempt will have the neighborhood number assigned according to its respective geographic area or the Use Type of the property.

Appendix F – Zoning Codes

ZONING

The Master Property File (MPROP) contains a zoning code for each property in the City. These codes were assigned by using the zoning map on the computer graphics system. The zoning field is an alpha numeric field that is seven digits in length.

For further clarification refer to the computerized ordinances available through the City of Milwaukee website at <https://city.milwaukee.gov/DCD/Planning/PlanningAdministration/ZoningCode> or contact the City of Milwaukee, Department of City Development, Land Use Planning Section.

MPROP Documentation

There are two new categories to the ZONING field in MPROP. These categories are not legal zoning codes, but rather flags for special situations.

- **X** = A problem has been identified with the zoning assigned to this parcel. Check with the City of Milwaukee's Department of City Development for details (planadmin@milwaukee.gov).
- **PENDING** = New zoning has been applied to this parcel. This zoning change divides the existing parcel into multiple zoning codes, and has been approved by the City of Milwaukee Common Council based on an approved certified survey map (CSM). The new zoning will correspond to new parcel boundaries defined in the associated CSM. The new parcel boundaries will be applied to the zoning map upon completion of legal boundary changes by the City of Milwaukee Assessor's office. At that time, the new

Appendix G – Land Use Codes

LAND-USE

The following is a description of the current listing of common Land Use Codes. These codes are based upon the Standard Industrial Classification (SIC) code, except for the residential series (8800-8899) which were developed locally.

For uses that cannot be found in this list, refer to the publication entitled, Standard Industrial Classification Manual, available from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

NOTE: The actual codes may not appear in the accompanying, pages but are available in another source file located on your MPROP distribution media. Refer to your 'README.DOC' file for the specifics of the location and format of the SIC.DBF or SIC.DAT files.

Conventions For Properties With More Than One Structure

Residential properties that have more than one structure per taxkey will have a '97' in the first 2 positions of BLDG-TYPE. The following convention has been adopted for residential properties containing more than one structure:

"Units" contains total number of dwelling units for all structures on the property.

Examples: Units = 4, Land Use Code = 8820

This property contains two two-family structures.

Units = 3, Land Use Code = 8820

This property contains one single-family and one two-family structure.

Units = 2, Land Use Code = 8810

Two single-family structures.

The Land Use Code for non-residential buildings under construction is 9850.

Appendix H – Land Use Categories

Land-Use-GP

As of this month's release (March, 2009), there will be a change in the way tax exempt parcels are assigned land use categories (LAND_USE_GP). As shown below, categories 11 and 12 are defined as public/quasi-public buildings or open space. Historically, all parcels that are tax exempt are also assigned to one of these groups. This has now changed. In order to better reflect the actual use of these properties, they are assigned to the group which most closely reflects their use.

CATEGORY NUMBER	CATEGORY DESCRIPTIONS
0	N/A (Land-use is unclassifiable at this time)
RESIDENTIAL:
